

EXODUS BIBLE STUDY AND GUIDE

LESSON 54 EXODUS 34:10-28

In the latter half of Exodus 33, Moses had begun to further intercede for the people. Although Jehovah had relented from destroying the people and commanded them to go forward, the alienation was plain. Moses sought assurances from Jehovah based upon His established relationship with Moses, that Jehovah's relationship with His people would be restored. This would be demonstrated by God's presence among His people as they went. Even as Jehovah assures him, Moses presses even more for Jehovah to reveal His glory, i.e., His person and character, perhaps as the basis upon which the assurances will be carried out.

Chapter 34 is the continuation and answer to Moses' request.

1. Chapter 34:10 is perhaps the answer for which Moses has been seeking.
 - What is at the heart of God's response to Moses' request?

 - What are the parts of the promise that accompanies the initial response?

2. In vv11-16, the LORD expands upon the promise. He includes several commands coupled with warning(s) to Moses for the people. Much of this is somewhat of a repetition of Exodus 23:24-35 before the confirming of the covenant in chapter 24.
 - What are the commands in the passage?

 - What are the warnings? What was added to the warning in the passage mentioned above?

 - What may be some applications for us from the current passage?
